

Yacht Slide

MEASURING GUIDE

Your slide's fit should look as good as your yacht - seamlessly integrated and beautifully displayed. Provide us with some important information, and we'll deliver a slide with superior form and fit.

top of handrail

A

water line

B

This is important if the boat could come into contact with the slide. Generally, this is not an issue as the angle of the slide will be 45 degrees.

center of handrail

outer edge of rub rail

C

top of handrail

For example: most railings are about 100cm in height.

top of deck surface

nearest vertical obstruction

D

top of handrail

Dimension D is the distance from the top of the rail to any obstruction above.

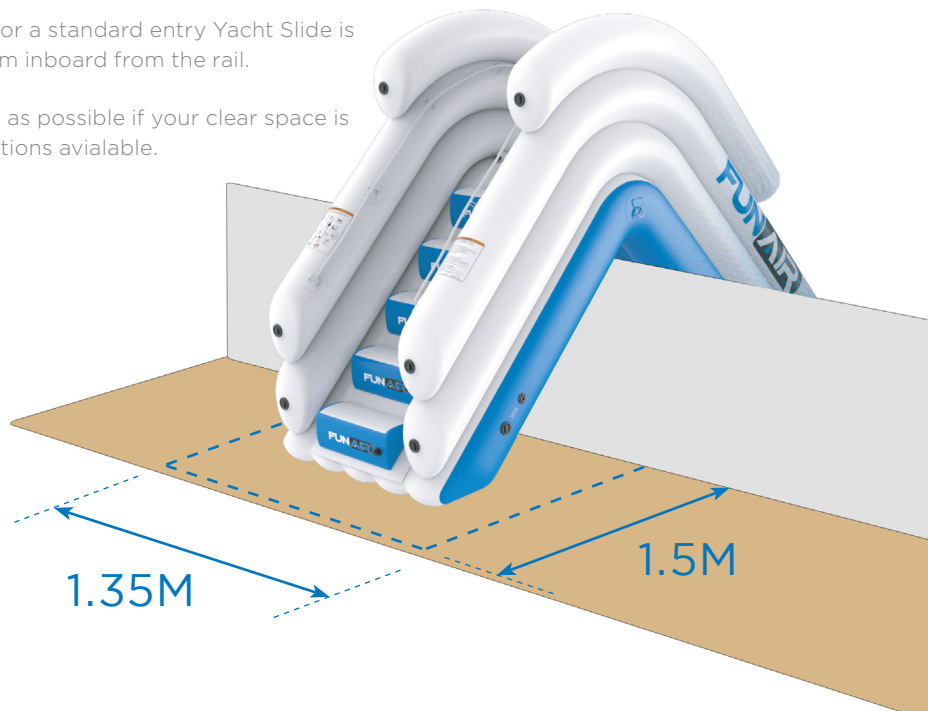

This dimension is required to ensure that there is enough vertical clearance for the slide.

Yacht Slide

STANDARD ENTRY FOOTPRINT

The minimum footprint for a standard entry Yacht Slide is 1.35m along the rail x 1.5m inboard from the rail.

Please advise us as early as possible if your clear space is less as we have other options available.

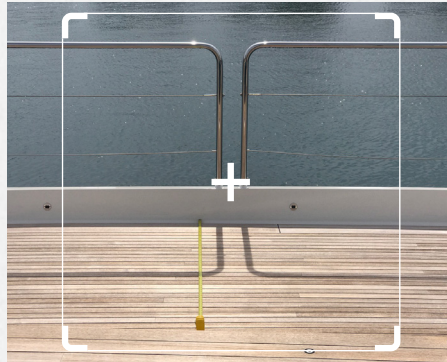

1.35M

1.5M
